

# VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

## 1 Overview

VTG-12 Indoor high voltage AC vacuum circuit breaker (hereinafter referred to circuit breaker) is used in the three-phase AC 50Hz indoor place with the rated voltage 12kV as the protection and control of the electrical facilities in the industrial mines, enterprises, power plant, and power substation, especially suitable for metallurgy, chemical, and coal industries.

Circuit breaker complies with the GB/T 1984 High Voltage AC Circuit Breaker, GB/T 11022 Common specifications for high-voltage switchgear and controlgear standards, DL/T 402 High Voltage AC Circuit Breaker, and related IEC standards.

The operating mechanism of circuit breaker is of the integrated design type. The operating mechanism and the primary circuit are front and back arranged, and they can be used as fixed installation unit (fixed cabinet) and also form a cart unit (cart cabinet) together with the propulsion mechanism (chassis truck).

## 2 Type Designation

## 3 Technical Parameters

### 3.1 Main Technical Parameters

No.	Item	Unit	Data		
1	Rated voltage	kV	12		
2	Rated lightning impulse withstand voltage (peak)		Gap 85, interphase, and to earth 75		
3	Rated power frequency withstand voltage (Imin)		Gap 48, interphase, and to earth 42		
4	Secondary circuit power frequency withstand voltage (Imin)		2000		
5	Rated frequency	Hz	50		
6	Rated current	A	630 ~ 1250	630 ~ 4000	1250 ~ 4000
7	Rated short circuit breaking current	kA	20、25	31.5	40
8	Rated short time withstand current		20 25	31.5	40
9	Rated peak withstand current		50 63	80	100
10	Rated short circuit making current (peak)		50 63	80	100
11	Rated operation sequence		O—0.3s—CO—180s—CO		O—180s—CO—180s—CO
12	Rated short circuit duration time	s	4		
13	Rated single/back-to-back capacitor bank breaking current	A	20 ~ 31.5kA		40kA
			630/400		800/400
14	Rated capacitor bank inrush making current	kA	12.2 (frequency not greater than 1000Hz)		
15	Mechanical life	Times	10000/customized		

## VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

No.	Item	Unit	Data
16	Rated short circuit current switching times	Times	50
17	Allowable wear accumulative thickness of the moving and stationary contact	mm	3
18	Rated closing and opening operating voltage	V	220、110
19	Contact opening distance, overstroke	mm	Opening 9±1 (11±1) Overstroke 3.5±0.5
20	Rated operating voltage: ON/OFF time		ON 30-70 OFF 20-50
21	* Contact closing bounce time	ms	≤2 (1600A and below), ≤3 (2000A and above)
22	Three-phase closing and opening simultaneity		≤2
23	Average opening speed (contact open 6mm)	m/s	0.9~1.3
24	Average closing speed		0.4~0.8
25	Main circuit resistance	μΩ	630A: ≤50 1250A≤45 1600、2000A: ≤40 2500A and above ≤30
26	Closing contact touch pressure	N	20kA、25kA: 2400±150 31.5kA: 3200±200 40kA: 4500±300

Note: "\*" indicates that there may be differences in the type of pole when the contact arm is not installed. Please refer to the technical requirements in the factory report.

### 3.2 Technical Data of Energy-Saving Motor

This product adopts special reducer used for permanent magnet type single-phase DC motor, and the technical parameters of motor are listed in table below.

Rated voltage (V)	Rated output power (W)	Normal operating voltage range	Energy storage time under rated voltage (s)
DC220	70/100	85%~110% rated voltage	≤15

### 3.3 Technical Data of Electromagnet

	Closing electromagnet	Opening electromagnet	Locking electromagnet
Rated operating voltage (V)	DC220	DC220	DC220
Coil power (W)	368	368	4
Resistance (Ω)	131.5±5% (20°C)	131.5±5% (20°C)	13600±5% (20°C)
Operating voltage range	85%~110% rated voltage	65%~120% rated voltage	85%~110% rated voltage

## VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

### 4 Operating Conditions

#### 4.1 Normal Working Conditions

- 4.1.1 Ambient temperature: The max. temperature is +40°C, and the min. temperature is -15°C (storage and transport at -30°C are allowed);
  - 4.1.2 Environmental humidity: The daily mean relative humidity is  $\leq 95\%$ , the monthly mean relative humidity is  $\leq 90\%$ ; the daily mean vapor pressure is  $\leq 2.2 \times 10^{-3}$  MPa, and the monthly mean vapor pressure is  $\leq 1.8 \times 10^{-3}$  MPa;
  - 4.1.3 The altitude does not exceed 2000m;
  - 4.1.4 The earthquake intensity does not exceed 8 degrees;
  - 4.1.5 There is no water drops, no flammable materials, no chemical corrosive gas and no severe vibration at the site.
- 4.2 If the normal working conditions are not met, please contact the manufacturing unit.

### 5 Features

- 5.1 Excellent overall performance of circuit breaker
  - 5.1.1 The solid-sealed pole and operating mechanism of circuit breaker are configured at front and rear, and are connected into a whole through the transmission mechanism.
  - 5.1.2 The mechanical life is 10,000 times and above.
- 5.2 The advanced vacuum arc extinguish chamber uses copper-chromium alloy contact and longitudinal magnetic field contact structure.
- 5.3 The integrally cast solid-sealed poles
  - 5.3.1 The solid-sealed pole is formed with new APG process.
  - 5.3.2 The vacuum arc extinguish chamber device is solid-sealed in the pole to efficiently prevent damage and surface contamination due to foreign matters while shortening the overall size of circuit breaker obviously.
- 5.4 Flexible and simple operating mechanism
  - 5.4.1 The operating mechanism is of the spring energy-storage type with electric and manual energy storage functions.
  - 5.4.2 When the circuit breaker is working, the energy from the energy-storage spring will be transferred to the link mechanism through the output cam and then to the dynamic contact through the link mechanism.
  - 5.4.3 With advanced and reasonable damping device, the break-brake rebound is small.
  - 5.4.4 No adjustment is required with very little maintenance.

## VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

### 6 Outline and Installation Dimensions

#### 6.1 Outline dimensions of handcart type circuit breaker(Phase distance 150)

Note: The handcart stroke is  $200 \pm 2$ mm, the dimension in the bracket is the pole distance 205mm

Rated current (A)	630	1250
Rated short-circuit breaking current (kA)	20/25/31.5	20/25/31.5
Mating fixed contact size (mm)	Φ35	Φ49

#### 6.2 Outline dimensions of handcart type circuit breaker(Phase distance 210, pole distance 275)

Note: The handcart stroke is  $200 \pm 2$ mm, and the size in brackets is 1,000mm wide cabinet.

Rated current (A)	630	1250	1600
Rated short-circuit breaking current (kA)	20/25/31.5	20/25/31.5/40	31.5/40
Mating fixed contact size (mm)	Φ35	Φ49	Φ55

## VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

6.3 Outline dimensions of handcart type circuit breaker(Phase distance 275, pole distance 310)

Note:

1. The handcart stroke is  $200 \pm 2$  mm, and forced air cooling is required for rated current 3150A and above;
2. The dimension in bracket is the reference dimensions of rated current 3150A and above.

Rated current (A)	1600	2000	2500/3150/4000
Rated short-circuit breaking current (kA)	31.5/40		31.5/40
Mating fixed contact size (mm)	Φ79		Φ109

6.4 Outline dimensions of fixed type circuit breaker(Phase distance 210, pole distance 275)

Note: The dimension in bracket is phase distance 275mm.

Rated current (A)	630	1250	1600
Rated short-circuit breaking current (kA)	20/25/31.5	20/25/31.5/40	31.5/40
Mechanism top interlock L (mm)	The interlock can be extended left or right(Standard configuration: left extension 50mm), and the length can be customized according to customer requirements		

## VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

6.5 Outline dimensions of fixed type circuit breaker(Phase distance 275, pole distance 310)

Note: The dimension in bracket is phase distance 275mm.

Rated current (A)	1600/2000/2500/3150/4000
Rated short-circuit breaking current (kA)	31.5/40
Mechanism top interlock L (mm)	The interlock can be extended left or right(Standard configuration: left extension 50mm), and the length can be customized according to customer requirements

6.6 Outline dimension drawing of side mounted fixed circuit breaker

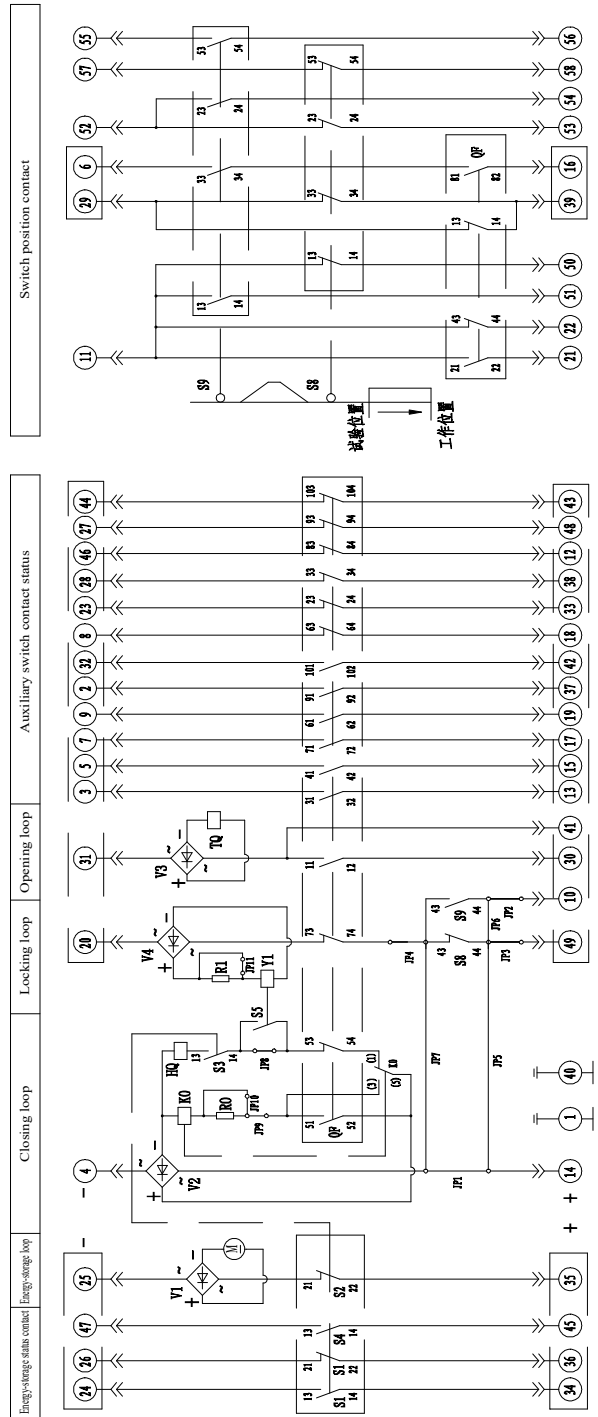

Note: L1 and L2 interlock outputs can be extended left or right. The length can be customized according to the customer's requirements. No extension is standard

## 7 Secondary Scheme Schematic Diagram

### 7.1 Handcart type scheme

- TQ Opening trip coil
- S9 Auxiliary switch (switched at work position)
- S8 Auxiliary switch (switched at test position)
- JP1-JP11 Jumper cable
- S5 Locked electromagnet micro switch (optional)
- S1-S4 Limit switch (switched after energy storage of the closing spring)
- QF Auxiliary switch (0-ONs and 10-OFFs (switched at the ON/OFF state))

- T (1-58) 58-core aviation plug
- K0 Internal anti-jump relay (optional)
- V1-V4 Rectifier
- Y1 Locked electromagnet coil (optional)
- M Energy-storage motor
- R0-R1 Resistance
- HQ Closing trip coil

Option wiring configuration:

Jumper cable Configuration	ab	hg	ef	cd	ae	af	ag	bc	ij	lk
With wire jumper	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
Without wire jumper	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

Section of operating power supply:

Operating power supply	Jumper cable	Im	tp
ACDC220V	✓	✓	✓
ACDC100V	✓	✓	✓

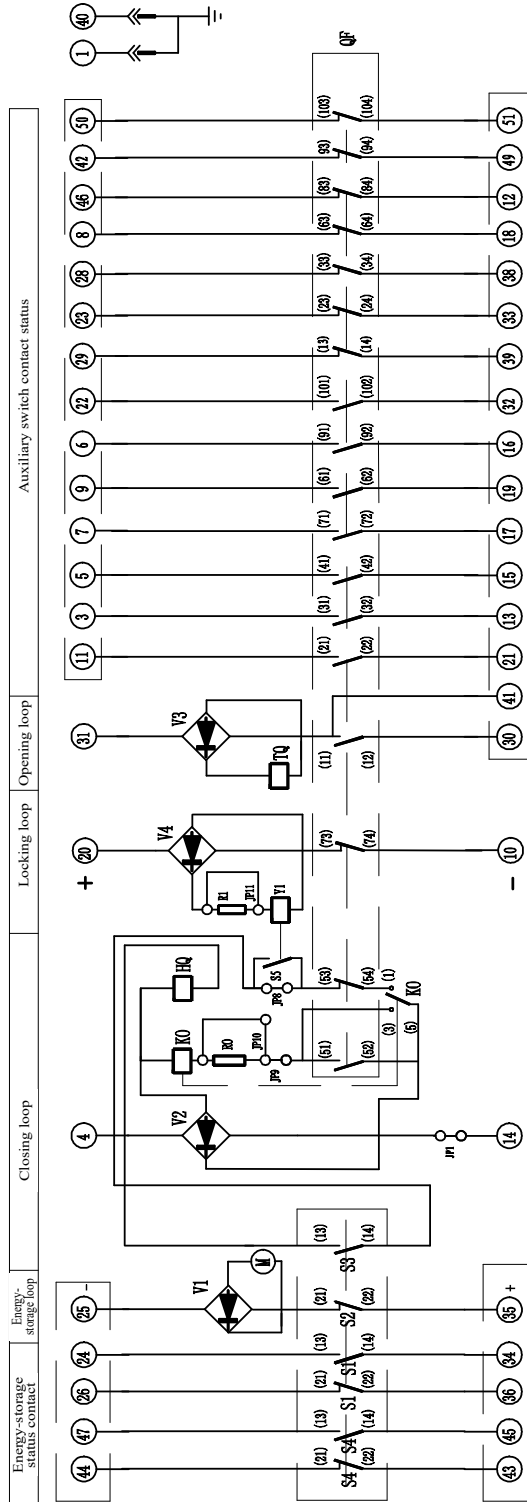

**Notes:**

- The circuit breaker is at the test position, is opened and at the non-energy-storage state.
- The polarities marked in the dashed box shall be the same during the DC power operation, and the motor shall be wired according to the polarity shown in figure.

Note: "✓" means disconnection, and "✓" means connection

# VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

## 7.2 Fixed scheme

HQ: Closing coil  
TQ: Opening coil  
M: Energy-storage motor  
RO-R1: Resistance  
V1-V4: Rectifier  
JP8-JP11: Jumper cable

S1-4: Micro switch (switched after energy storage of the closing spring)  
S5: Micro switch (optional)  
QF: Auxiliary switch (switched during ON/OFF operations)  
Y7-Y9: Indirect overcurrent release (optional)  
Y1: Locked electromagnet (optional)  
K0: Anti-jump relay (optional)

Notes:  
1. The polarities marked in the dashed box are the same when the DC power supply is used.  
2. As shown in figure, the circuit breaker is at the open and non-energy-storage state; the motor is wired according to the polarity shown in figure.

### Option wiring setting:

Jumper set Configuration	JP1 (a-b)	JP2 (b-g)	JP3 (e-f)	JP4 (c-d)	JP5 (a-f)	JP6 (a-g)	JP7 (b-c)	JP8 (t-j)	JP9 (l-k)
With wire jump	✓	✓	✓	✓	✓	✓	✓	✓	✓
Without lock	✓	✓	✓	✓	✓	✓	✓	✓	✓
Without wire jump	✓	✓	✓	✓	✓	✓	✓	✓	✓

### Selection of operating power supply:

Operating power supply	JP10 (l-m)	JP11 (q-r)
AC/DC20V	✓	✓
AC/DC110V	✓	✓

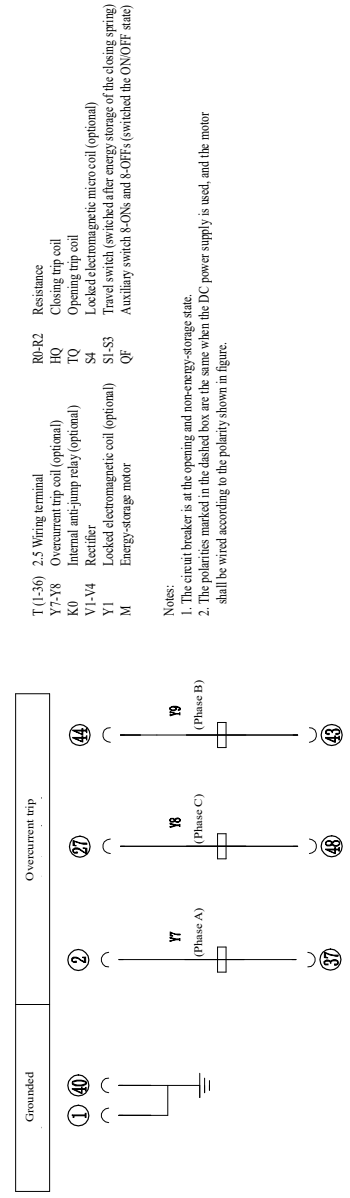

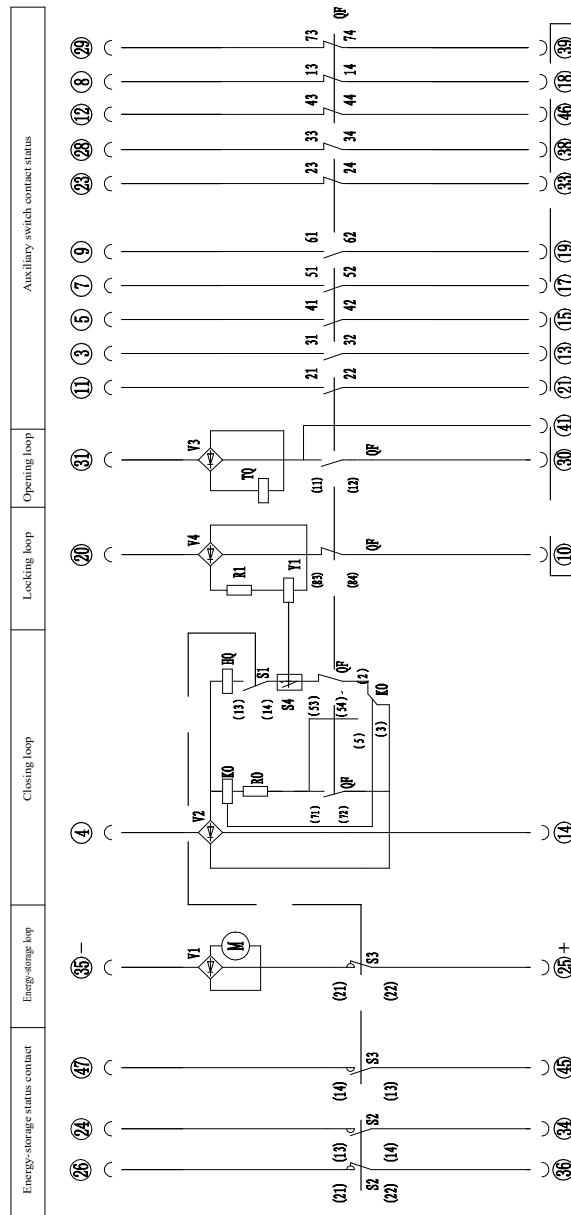

Note: "✓" means disconnection and "✓" means connection

# VTG-12 Indoor Solid-Sealed Medium-voltage AC Vacuum Circuit Breaker

## 7.3 Side-mounted fixed scheme

- T (1-36) 2.5 Wiring terminal  
 Y7-Y8 Overcurrent trip coil (optional)  
 K0 Internal anti-jump relay (optional)  
 V1-V4 Rectifier  
 Y1 Locked electromagnetic coil (optional)  
 M Energy-storage motor  
 R0-R2 Resistance  
 HQ Closing trip coil  
 TQ Opening trip coil  
 S4 Locked electromagnetic micro coil (optional)  
 S1-S3 Travel switch (switched after energy storage of the closing spring)  
 QF Auxiliary switch 8-ONs and 8-OFFs (switched the ON/OFF state)
- Notes:  
 1. The circuit breaker is at the opening and non-energy-storage state.  
 2. The polarities marked in the dashed box are the same when the DC power supply is used, and the motor shall be wired according to the polarity shown in figure.
